

Project: CS Monitor 6.0.3.0

Operating Limitations

77 – Maximum number of rows in a report

The limitation is applied from version **4.0.0.0**

Description:	Comments:
For all reports, the maximum number of rows is 65536 (Microsoft Excel limitation)	

78 – Default regional settings (separators for date and list elements) for localized Windows versions

The limitation is applied from version **4.0.0.0**

Description:	Comments:
To provide proper operation of the Reports on Collection module, the "." (dot) symbol should be used as the date separator in the Windows Regional Options (the "DD.MM.YYYY" short date format should be set). This is the default setting for localized Windows	

79 – Impossibility to perform operations with Excel instance when reports are being generated

The limitation is applied from version **4.0.0.0**

Description:	Comments:
While reports are being generated, do not open any *.xls files in the Excel instance already running. If you need to perform operations with *.xls documents, launch another Excel instance	

167 – MD5 authentication

The limitation is applied from version **4.0.0.0**

Description:	Comments:
The functionality of mailing in the OC Reports software module does not support MD5 authentication	

194 – "Collection on terminals" report: viewing information about a collection of a terminal if the IN file received during the collection is processed completely forcibly in the CSM

The limitation is applied from version **6.0.0.0**

Description:	Comments:
The "Collection on terminals" report does not display information about a collection if the IN file received during the collection (while the CSM is not running) is processed completely forcibly in the CSM. The date of the last terminal collection will be recorded in the OC database	

455 – Some modes do not support on-line collection processing

The limitation is applied from version **6.0.2.0**

Description:	Comments:
When the CSM is started as a service, and the CS is started from the EXE file, processing is not performed for on-line collection	

Systems Compatibility**Communications Server**

Description:	Comments:
2.1.9.19 and later versions	

Operation Centre

Description:	Comments:
5.11.1.0 and later versions	

OC Reports

Description:	Comments:
6.0.6.0 and later versions	6.1.1.0 Foreign versions starting from 6.1.1.0
