"CS MONITOR (CSM)"	3
"REPORTS ON COLLECTION (CSM)".....	3
VERSION: 6.0.2.1	4
"CS MONITOR (CSM)"	4

VERSION: 6.0.3.0**Console****Modifications:**

5006 – Support for 64-bit operating systems has been introduced

5007 – Possibility to install and run the software without the DBA role has been introduced

To improve security of the database and to restrict access to the database, it is now possible to run the software without the DBA role.

"CS Monitor (CSM)"**Modifications:**

4999 – The "Inventory of terminals" report. In the column with the terminal software version number, the build number is now displayed

To provide detailed information about the version number of the terminal software loaded into the terminal, the build number of the terminal software is now displayed for each terminal included in the report.

"Reports on collection (CSM)"**Corrections:**

5005 – An error causing incorrect functioning of the filter by collection date in the "POS groups" tab has been corrected

The error occurred in versions 6.0.1.0 and 6.0.2.1.

VERSION: 6.0.2.1**"CS Monitor (CSM)"****Modifications:**

4594 – Windows 7 support has been introduced

4593 – Oracle 11 support has been introduced

Corrections:

4808 – An error causing data loss in case of a large number of simultaneous collections has been corrected

Due to this error, when more than 100 terminals were being collected simultaneously, threads with identical numbers could be created, and data from only one of such threads were recorded in the database.

The algorithm for creating threads has been corrected.
